Vantage Towers opens new Berlin representative office

- Sarah Neumeyer is leading the new office

Berlin/Düsseldorf, 21 September 2023 - Vantage Towers, a leading European infrastructure operator, has opened a new representative office in Berlin. With the office located in the Lindenpalais, the Düsseldorf-based company is building a bridge to political Berlin. With this move, Vantage Towers is underlining its intention to actively participate as a contact in the political discourse on the expansion of mobile communications and to create a comprehensive understanding of the tower companies' key role in the expansion of 5G and in shaping Germany's digital future.

Sarah Neumeyer, who has been Senior Manager Public Affairs at Vantage Towers, will be in charge of the new representative office. Sarah Neumeyer has been working in the Public Affairs team at Vantage Towers since October 2022. With a degree in political science, she has held various positions in political Berlin over the past twenty years, most recently as head of the Berlin office of the Association of Telecommunications and Value-Added Service Providers (VATM). In her new role, she reports to Ralf Capito, Director External Affairs at Vantage Towers.

Ralf Capito, Director External Affairs at Vantage Towers: "Being close to Berlin's political sphere is indispensable for a tower company whose clients operate in a highly regulated environment such as the telecommunications market. With Sarah Neumeyer, we were already able to win an excellent and highly experienced public affairs expert for Vantage Towers last year. I am all the more pleased that she is taking the lead in our Berlin office and will represent us as a strong voice of the TowerCos."

About Vantage Towers

Vantage Towers is a leading tower company in Europe with more than 84,000 sites in ten countries, connecting people, businesses and devices in cities and rural areas. The company was founded in 2020 and is headquartered in Düsseldorf.

Vantage Towers' portfolio includes towers, masts, rooftop sites, distributed antenna systems (DAS) and small cells. By building, operating and leasing this infrastructure to MNOs or other network providers such as IoT companies or utilities, Vantage Towers is making a significant contribution to a better-connected Europe.

While already 100% of the grid electricity that Vantage Towers uses to operate its infrastructure is obtained from renewable energy sources, green energy generation is piloted directly on site

with the help of solar panels and micro wind turbines, and also hydrogen solutions are under testing. This fits well into the overall strategy of the company to drive a sustainable digitalisation in Europe and to support partners through technological innovation in decarbonisation and achieving their climate goals.
